

# Importance of IoT in Service Provider Gateways

#### **Chris Ince**

Business Development Executive, Smart Home, NA

#### Joep van Eijden

Business Development Executive, Smart Home, EMEA

#### Place holder

Chris and Joep - live talking heads for Intro

## Is IoT Relative and should I participate?

- 75% of buyers in US have a smart gadget at home Source – Digitized House
- By 2023, the Smart Home industry automation in US homes will exceed 50% Source – Wonder
- The smart homes market was valued at USD 79.13 billion in 2020, and it is expected to reach USD 313.95 billion by 2026 and register a CAGR of 25.3% over the forecast period (2021 - 2026). Source – Mordor Intelligence
- 47% of US millennials use smart home products today Source – Alarms.org

# Traditional Service Provider services = "Triple-Play"

**Television** 

**High-Speed Internet** plus Home Wi-Fi

**Home Phone** 

# IoT / Smart Home is the Fourth Play

- Security
- Lifestyle
- Multi-family buildings
- Wellness
- Energy management
- Data gathering

#### IoT Controller Evolution

#### Dedicated Hubs / Border routers –

Original Controller Option.

#### Smart Speakers –

Example of multi-purposing a gateway

#### Wi-Fi Extender w/ IoT –

New trend. Convenient location to host IoT radio.

#### Wi-Fi Gateway/Router w/ IoT –

 Growing trend. Obvious place to initiate IoT control/ network.

#### Service Provider Testimonials

Place holder for Testimonial video from Comcast

# **Business Model Aspects**

- CAPEX
- OPEX
- Churn rate
- ARPU
- "Table stakes"

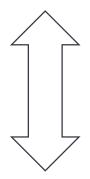

## **Business Strategy**

Internet Access To the Home

• Internet Access In the Home To the Device

Connected Home Experience

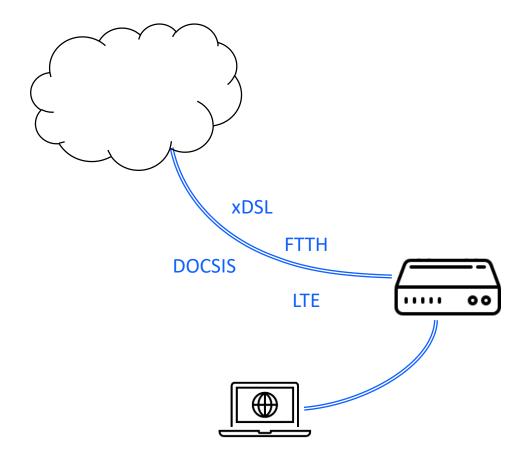

#### **Passive**

**Proactive** 

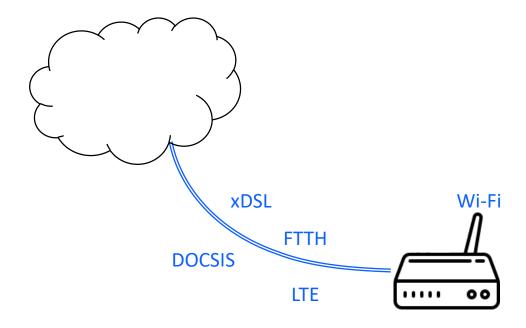

# In the Beginning: Wired Internet Access Only

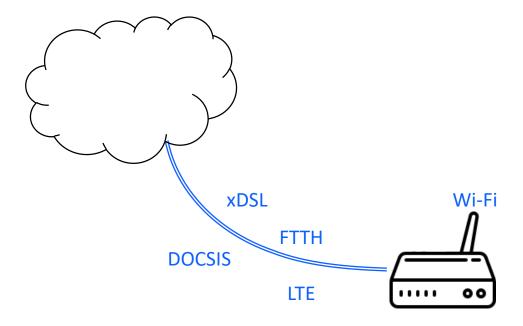

## Service Providers start to offer Wi-Fi

Capex	Opex	Churn	ARPU
7			

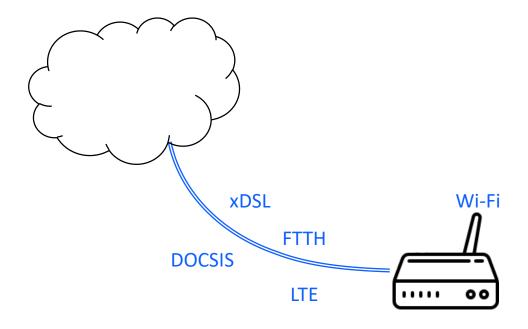

## Poor Wi-Fi Backfires

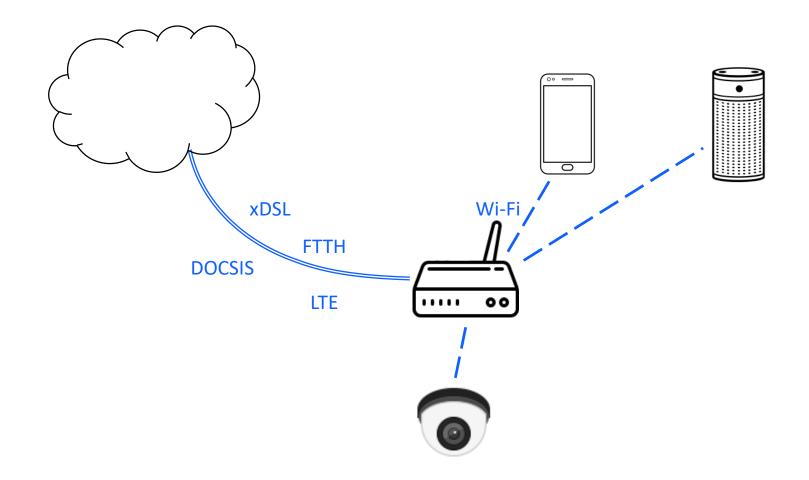

# Good Wi-Fi Becomes a Minimum Offering

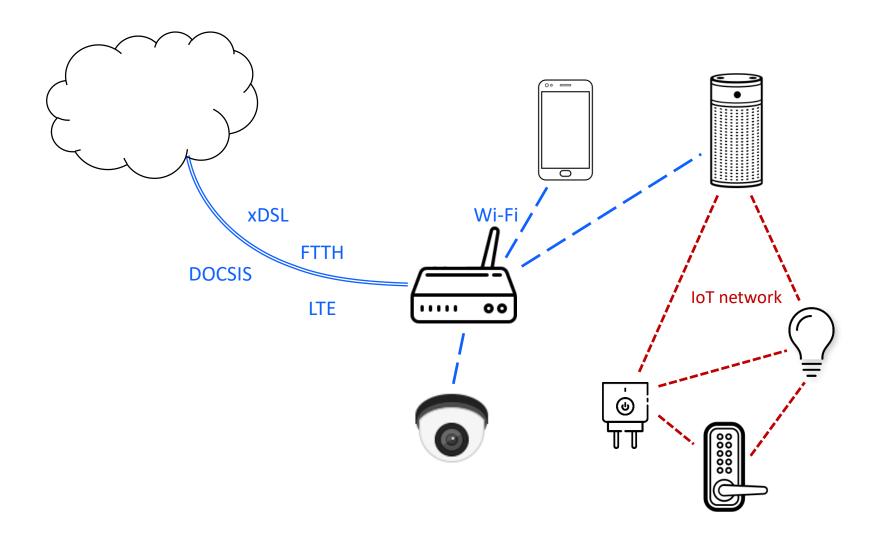

Capex	Орех	Churn	ARPU
7,	II		7

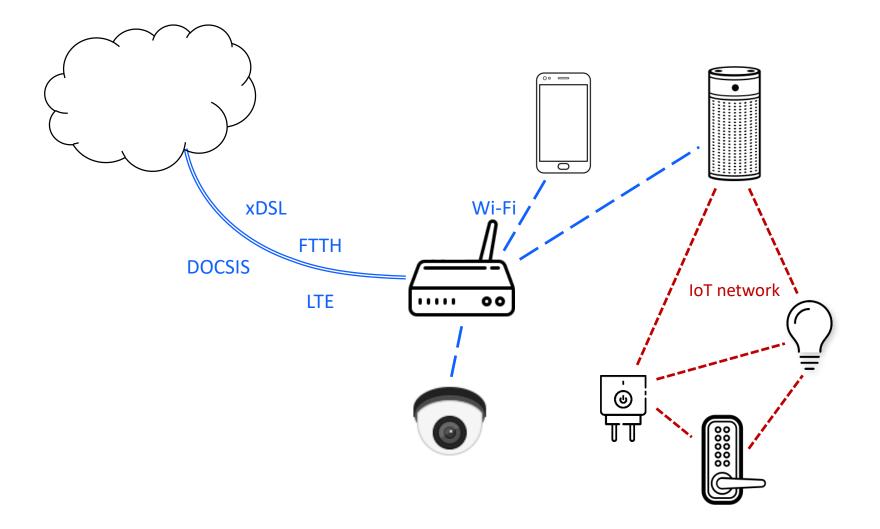

# Wi-Fi Networks Grow Bigger

# Smart Speakers Build own IoT Networks

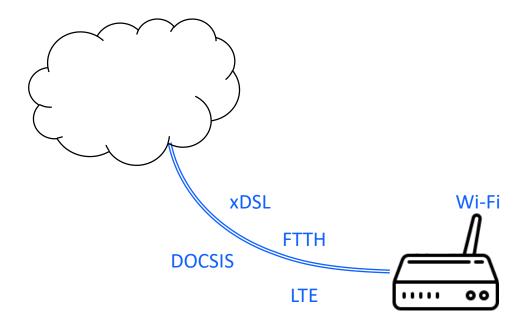

# The Result of a Passive Approach to IoT

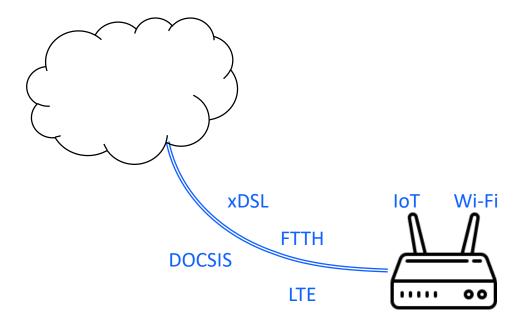

Capex	Opex	Churn	ARPU
77	7	7	Z

# Good Wi-Fi is a Minimum Offering (Proactive Scenario)

Сарех	Opex	Churn	ARPU
77			

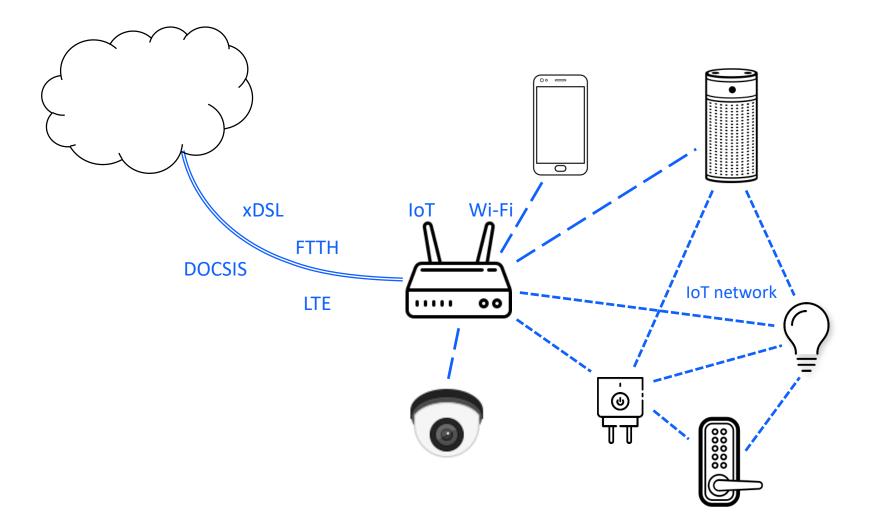

# Good Wi-Fi and IoT Considered Minimum Offering

Capex	Opex	Churn	ARPU
77			

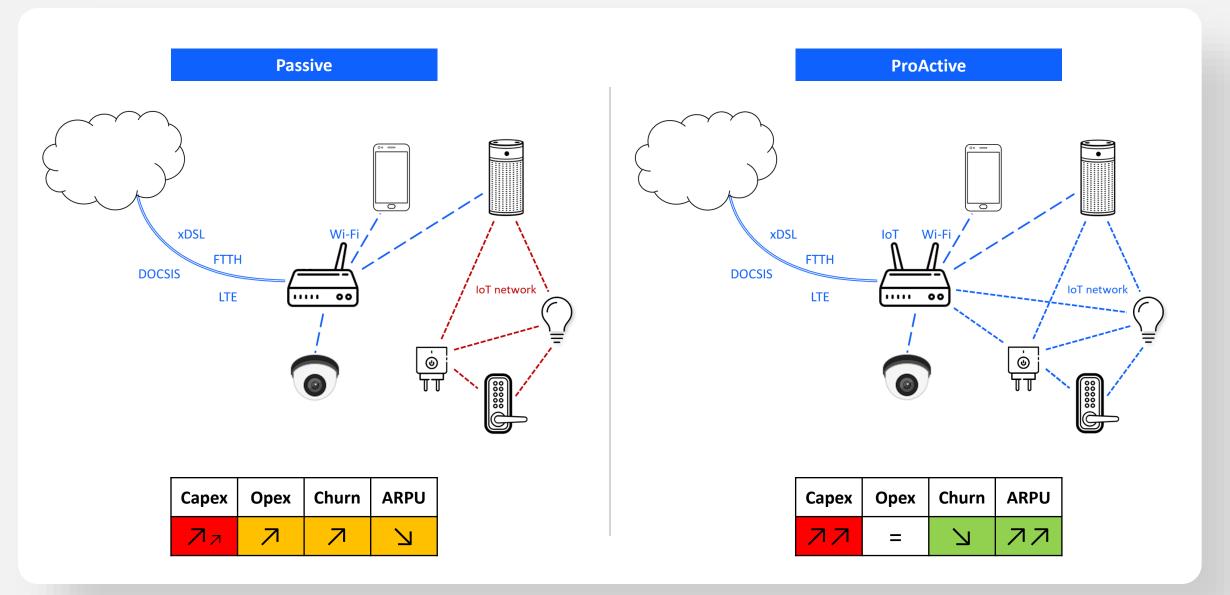

#### Service Provider Offers Smart Home Services

Capex	Opex	Churn	ARPU
77	II	Z	77

# Passive versus Proactive Approach to IoT

# Gateway Architectural Considerations

- Protocol:
- Multi-protocol options:
- What does app partner use?

# Does Thread / Matter change landscape for the Wi-Fi gateway?

- Matter devices use Wi-Fi or Thread
- With Wi-Fi and Thread in the gateway can manage both networks
- No dependence on 3rd party border routers
- Prevent interference between Wi-Fi and Thread via Packet Traffic Arbitration
- Option to use Thread radio for Zigbee simultaneously

## **Bridging Protocols**

#### Challenge:

Multiple IoT protocols/devices in single home.

#### Solution:

Gateway "bridge" can link multiprotocol networks. (ZW/ZB/BLE/WiFi/Matter etc...)

## Gateway Equipment examples

- Askey: Wifi gateway with ZW / ZB
- <u>Technicolor</u>: Gateway + Wifi extender with ZW and ZB / Matter
- Commscope: Wifi Gateway with ZW and ZB / Matter
- Sercomm: Wifi Gateway with ZW / ZB
- Arcadyan: Wifi Ext with ZW / ZB
- Sagemcom: Gateway with ZW / ZB

# ODM Testimonials / Examples
