## Revision History

### Rev. Description

A00 Initial version for manufacturing

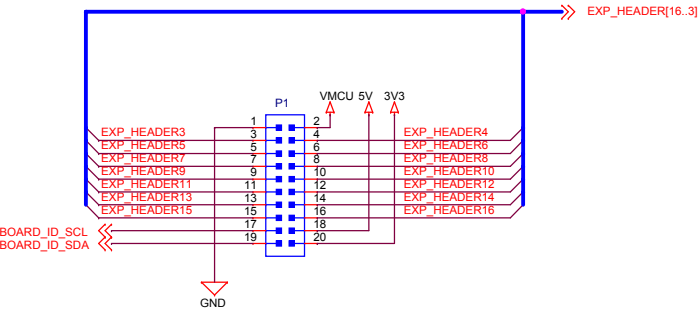

A01 EXP\_HEADER12 and EXP\_HEADER\_13 signals are swapped

A02 Module power changed from 3.3V to VMCU

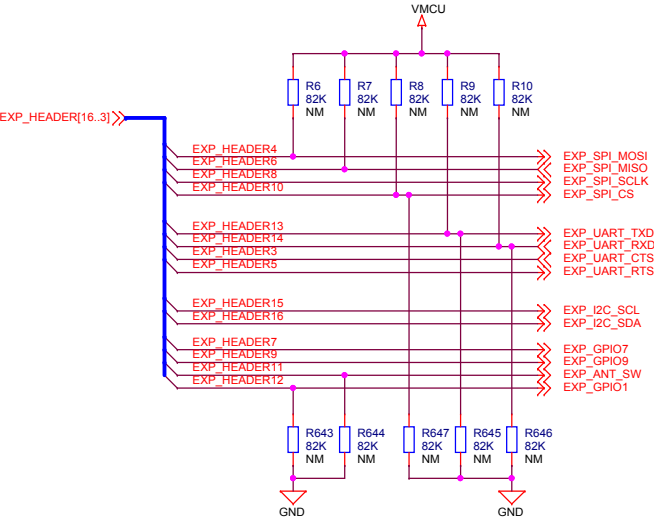

|                                                                                                              |                                                         |                                                |                        |
