

# UG299: Si5332-6EX-EVB User's Guide

The Si5332-6EX-EVB is used for evaluating the Si5332 Low Jitter Any-Frequency Clock Generator. The Si5332 uses the patented Multisynth™ technology to generate up to six independent clock frequencies each with 0 ppm synthesis error. The Si5332-6EX-EVB has two independent input clocks. The Si5332-6EX-EVB can be controlled and configured using the Clock Builder Pro™ (CB Pro™) software tool.

## EVB FEATURES

- Powered from USB port or external power supply.
- Onboard 25 MHz XTAL allows free-run mode of operation on the Si5332 or up to 1 input clocks for synchronous clocking.
- CBPro™ GUI programmable VDD supply allows device to operate from 3.3, 2.5, or 1.8 V.
- CBPro GUI programmable VDDO supplies allow each of the 10 outputs to have its own power supply voltage selectable from 3.3, 2.5, or 1.8 V.
- CBPro GUI-controlled voltage, current, and power measurements of VDD and all VDDO supplies.
- SMA connectors for input and output clocks.

- 2. Si5332 CBPro™ . . . . . 4
- 3. Si5332-6EX-EVB Schematics . . . . . 5
- 4. Si5332 CBPro™ EVB GUI . . . . . 6
- 5. Installing ClockBuilderPro (CBPro) Desktop Software . . . . . 7

## 1. Functional Block Diagram

Below is a functional block diagram of the Si5332-6EX-EVB. This EVB can be connected to a PC via the main USB connector for programming, control and monitoring. See section “2. Quick start” or section “7. Installing CBPro Desktop Software” for more information.

**Figure 1.1. Si5332-6EX-EVB Functional Block Diagram**

## 2. Si5332 CBPro™

The Si5332 is intended to be part of the CBPro software and this initial software release “showcases” that trait. This software contains:

1. An EVB GUI that communicates and controls the EVB by allowing the user to set VDD supplies
2. The ability to modify frequency plan (from the starting point CBPro file provided with this limited release) from an existing CBPro file.

**Figure 2.1. CBPro Start Screen**

### 3. Si5332-6EX-EVB Schematics

The schematic and layout files are provided in the here: [schematics and layouts](#).

Please review the files, especially the DUT page in order to get familiar with using the EVB through CBPro™.

## 4. Si5332 CBPro™ EVB GUI

The EVB GUI can be used to communicate the part for register access:

The first page shows the board's identity.

Figure 4.1. Board ID Page

The other pages for for register access, VDD control, and GPIO control.

Figure 4.2. Register Access

## 5. Installing ClockBuilderPro (CBPro) Desktop Software

To install the CBOPro software on any **Windows 7** (or above) PC:

Go to <https://www.silabs.com/products/development-tools/software/clockbuilder-pro-software> and download ClockBuilderPro software. Both installation instructions and User's Guide for ClockBuilderPro can be found at this link. Please follow the instructions as indicated.

## ClockBuilder Pro

One-click access to Timing tools, documentation, software, source code libraries & more. Available for Windows and iOS (CBGo only).
